

## **Kennisis Lake Broad-Scale Fisheries Monitoring - UPDATE**

Establishing the health of the Kennisis Fishery was one of the initiatives identified as a priority in the Kennisis Lake Plan. The MNR is supporting this work with fish netting studies and spawning bed identification. A workshop is scheduled on Friday September 24, to provide details of the current Kennisis Lake Fishery project. Please see the information below from David Flowers of the MNR regarding the upcoming workshop.

### Kennisis Lakes Fishery Workshop

You are cordially invited to a workshop on **Friday Sept 24, from 3 to 5 pm @ Haliburton Forest and Wildlife Meeting Room**, to discuss our fall plans for our Community Fisheries Involvement Project on Kennisis Lake.

This workshop is sponsored by the KLCOA with the Cooperation of the Ministry of Natural Resources.

David Flowers (Fisheries Biologist) will lead discussions on field procedures concerning the safe implementation of a volunteer lake trout/ brook trout watch. This meeting will involve informal group discussions, both day and evening work is planned on Kennisis Lake this fall and we will endeavor to locate and map potential areas where lake trout and brook trout spawn in the lake.

If you are interested in volunteering for this work or would like to hear more details about this project please mark this date in your calendar and send David Flowers (david.flowers@ontario.ca) or Jim Prince (jimprince@sympatico.ca) a reply confirming your attendance at this meeting.

Thank you for your interest.....
